

AGUSTIN DANIEL VIGO

Gameplay Programmer & Level Designer | Unity / C#

agustindvigo@gmail.com | Buenos Aires, Argentina

[linkedin.com/in/agustin-daniel-vigo](https://www.linkedin.com/in/agustin-daniel-vigo) | github.com/V2Zeus-Agus | zeus-agus.itch.io

Advanced Game Development student (UADE), focused on gameplay programming and level design in Unity/C#. Lead programmer on complete, published projects, with real team experience and version control using Git. EU work authorization through Argentine, Spanish, and Italian citizenship. Native Spanish and Brazilian Portuguese speaker, intermediate English (B1). Available full-time.

PROJECTS

Galactic Defenders | 2D shoot 'em up | Unity / C# | Published on itch.io | Team of 4

- Lead programmer (about 60% of the code) and sole level designer: shooting systems, player movement, enemy AI, wave spawning, power-ups, and boss encounters.
- Performance optimization using object pooling in the enemy/projectile spawner; settings system (resolution, fullscreen, volume) persistent across sessions.

Project-Forge (seminar project) | Unity / C# | Git / GitHub | Team of 8

- Level design and programming of dynamic weather events affecting gameplay. Collaborative development with version control (traceable contributions through commits).

Waves of Blood | 2D top-down shooter | Unity / C# | Published on itch.io | Team of 2

- Arena level design, full UI (HUD, weapon selection, defeat screen), and sound design; code contributions.

The Secret Dungeon | Unreal Engine 5 | Published on itch.io | Team of 4

- Level Designer: designed 100% of the map for a first-person exploration and escape game; interactive traps implemented in Blueprints.

MyBomberman | Unity / C# | Solo Project | Published on itch.io

- Bomberman-style clone with local multiplayer (2 to 4 players), built solo in one week: grid-based movement, explosions, and power-ups.

Extract or Die: | Published on itch.io / Unity C# Photon Pun2

- cooperative isometric online shooter (up to 5 players); networking and UI programming. Team of 5.

TECHNICAL SKILLS

Engines: Unity (primary), Unreal Engine

Languages: C#, C++

Multiplayer / Networking: Photon PUN2 (lobbies, rooms, online sync)

Programming: object-oriented programming (OOP), gameplay mechanics, UI, performance optimization (object pooling), debugging

Tools & Practices: Git / GitHub (version control), Visual Studio, teamwork

Design: level design, game design

EDUCATION

Game Development Degree Program, UADE

Aug 2023 - Present

Currently completing coursework; two courses remain to finish the intermediate Game Development Technician qualification within the program.

LANGUAGES

Spanish (native) | Brazilian Portuguese (native) | English (B1, intermediate)
