AGUSTIN DANIEL VIGO

Gameplay Programmer & Level Designer | Unity / C#

agustindvigo@gmail.com | Buenos Aires, Argentina

Game Development student at UADE, focused on gameplay programming and level design in Unity/C#. Five games published on itch.io using Git. EU work authorization (Argentine, Spanish and Italian citizenship). Native Spanish and Brazilian Portuguese, intermediate English (B1). Available full-time.

EXPERIENCE

ACE 87 Studios Oct 2026 - Present

Level Designer (Blockouts)

PROJECTS

Project-Forge (seminar project)

- Level design and programming for dynamic weather events that change how the game plays. Team of 8, using Git for version control.

Galactic Defenders

- Main programmer (about 60% of the code) and sole level designer: shooting systems, player movement, enemy AI, wave spawning, power-ups, and boss encounters.
- Performance optimization using object pooling in the enemy/projectile spawner; settings system (resolution, fullscreen, volume) persistent across sessions.

Waves of Blood

- Arena level design, full UI (HUD, weapon selection, defeat screen), and sound design; code contributions.

Extract or Die

- Co-op isometric online shooter for up to 5 players, built with Photon PUN2. Networking and UI programming.

The Secret Dungeon

- Level Designer: designed 100% of the map for a first-person exploration and escape game; interactive traps implemented in Blueprints.

MyBomberman

- Bomberman-style clone with local multiplayer (2 to 4 players), built solo in one week: grid-based movement, explosions, and power-ups.

TECHNICAL SKILLS

Engines: Unity (primary), Unreal Engine

Languages: C#, C++

Multiplayer / Networking: Photon PUN2 (lobbies, rooms, online sync)

Programming: object-oriented programming (OOP), gameplay mechanics, UI, performance optimization (object pooling), debugging

Tools & Practices: Git / GitHub (version control), Visual Studio, teamwork

Design: level design, game design

EDUCATION

Game Development Degree Program, UADE Aug 2023 - Present

Currently completing coursework; two courses remain to finish the intermediate Game Development Technician qualification within the program.

LANGUAGES

Spanish (native) | Brazilian Portuguese (native) | English (B1, intermediate)
